

MitySOM®-5CSX Embedded Vision Development Kit for Basler dart BCON Cameras

The fastest path for embedded imaging application development

Critical Link's MitySOM-5CSX Development Kit delivers:

- On-board image processing with FPGA fabric and dual core ARMs
- Rapid prototyping using Altera's VIP Suite and OpenCL
- A variety of sensors and communication interfaces

Featuring:

- Small form factor board level design
- LVDS interface
- Popular CMOS sensor options from e2v & ON Semiconductor
- Basler's user-friendly pylon Camera Software Suite included free
